

Government and public safety

Automated time tracking and employee scheduling

TCP automates time tracking and employee scheduling for state governments and small volunteer agencies alike, so you can offer employees ease and efficiency, keep budgets on track, and minimize compliance exposure.

Benefits

- **Drive efficient business processes and improve service delivery** by swapping time-consuming manual tasks with automated workflows.
- **Control costs and protect taxpayer dollars** by improving payroll and scheduling accuracy, controlling overtime, and eliminating time theft.
- **Improve transparency and employee experiences** with fair and transparent leave processes and 24/7 self-service access to schedules, hours, and accruals.
- **Support departmental nuance** by configuring our solutions to match each department's shift and pay structures, overtime rules, and leave policies, while still attaining centralized visibility.
- **Mitigate compliance risk** by adhering to labor laws, union rules, and minimum staffing requirements.
- **Rest easy with proper public safety coverage on every shift** for optimal community services and protection.

The system performs all of the functions we were looking to accomplish in a simple but elegant way. We were guided through all of the steps necessary to deploy the new technology, and to ensure our on-time go-live.

Kevin Combs | Chief Information Officer

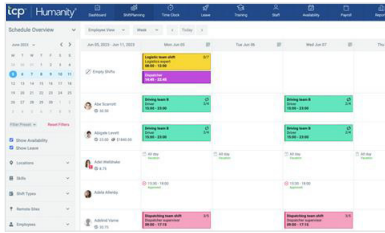

Maryland Department of Public Safety and Correctional Services (DPSCS)

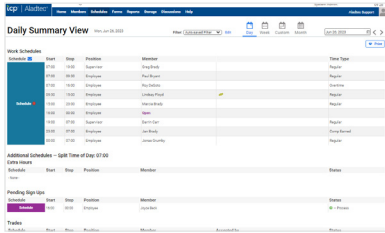

Automated solutions for governments and public safety agencies

Time and attendance
Automated time tracking with options for highly configurable clocks

Dynamic employee scheduling
Automated scheduling for general government

24/7 shift scheduling for public safety
Dedicated scheduling tools aligned to the requirements of public safety

Immediately we saw the advantages—taking a tremendous amount of time off of our shift supervisors. We have streamlined so many processes into one system. It has made life so much easier.

Chad Black | Director
Habersham County Emergency Services
