

# Healthcare

## Dynamic employee scheduling and automated time and attendance

TCP helps medical centers and healthcare providers control costs, drive compliant schedules for just-right patient care, and improve employee experiences.

### Benefits

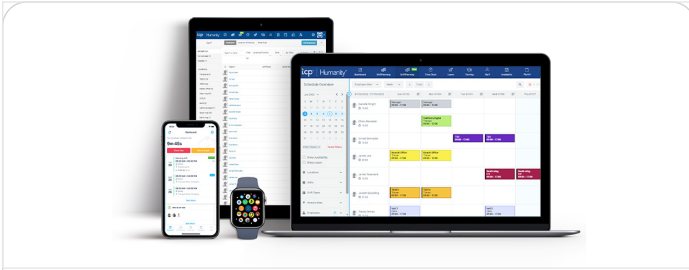

- **Drive just-right coverage for compliant schedules** by auto-scheduling the right staffing mix for proper patient care.
- **Control labor costs** by eliminating overscheduling, preventing unneeded overtime, and automating payroll calculations for shift differentials, overtime, and more.
- **Provide standout employee flexibility and transparency** at every touch point, from availability submissions to easy time capture to 24/7 self-service access.
- **Automate shift communications and configure shift trades** via our top-rated mobile app.
- **Reduce time spent on employee scheduling by up to 75%**, easily fill call offs with available and qualified staff, and monitor staff hours across departments and facilities. <sup>1</sup>
- **Streamline government reporting** with built-in tools for quarterly Payroll-Based Journal reports.

## Automated solutions for healthcare

### Dynamic employee scheduling

AI-powered forecasting, automated scheduling, and a top-rated mobile app that employees love

### Automated time and attendance

Accurate calculations across nuanced payroll rules and highly flexible time collection, including mobile

## What our customers are saying

I love being able to customize what we define as a regular workweek and a regular shift. Humanity streamlines scheduling to our needs and allows us to attach rules specifically to individual roles. Plus, everything is really simple to manage.

**Sean Yost** | Executive Director, Optional Rehabilitation Services (OPTIONS)

We are a large dental practice with 65 hourly employees. We have used TimeClock Plus for over 20 years. Their technology stays up-to-date, the reporting is very user friendly and support staff are very knowledgeable. You can set perimeters for employee access when clocking in and out, and I use the employee demographic reports for several HR projects.

## Escape the time integrity trap

When you're in the trap, people aren't scheduled or paid correctly, inaccuracies drain budgets, inefficiencies kill productivity, and workers burn out. There's a better way. **Reach out to learn more.**
