

Job costing

TimeClock Plus provides deep insight into labor, grant, and job tracking, allowing visibility into where hours and budgets are being allocated.

Key benefits:

01

Enable precise billing and invoicing: Track costs directly associated with specific jobs or services to drive accurate reporting and billing.

03

Enjoy enhanced cost control: Facilitate detailed comparisons of actual versus budgeted costs.

02

Optimize profitability: Closely monitor labor and project costs to maximize profit margins and more accurately budget and bid on future projects.

04

Make informed decisions: Better understand resource allocation, operational efficiency, and strategic adjustments for better management outcomes.

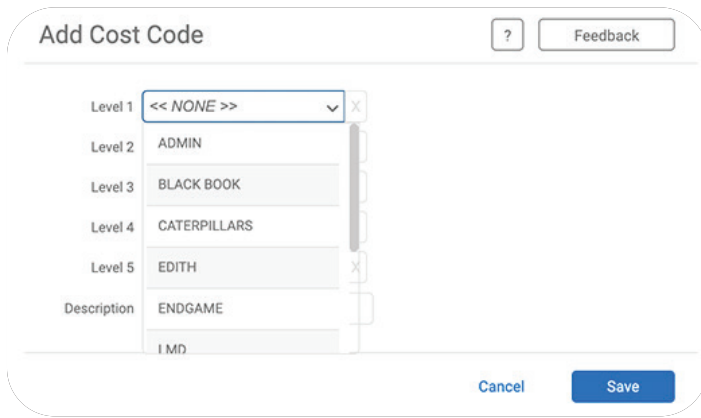

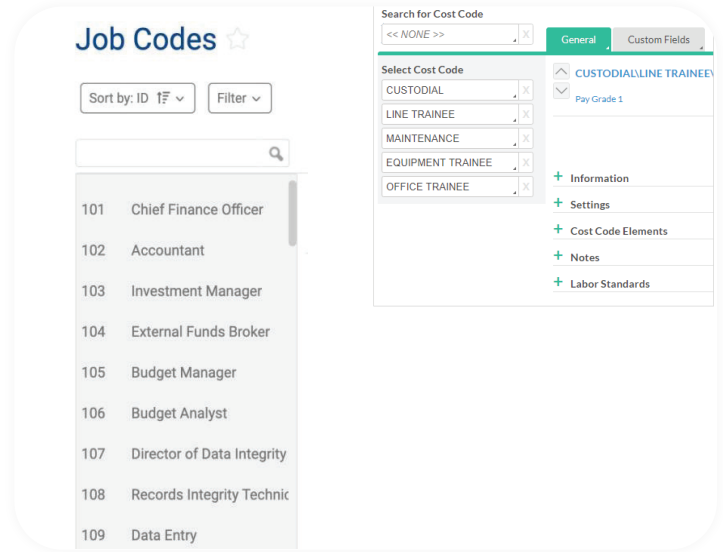

“You can customize [TimeClock Plus] based on client needs fairly easily. Both employees and managers find the system user friendly and simple to use, without much training or assistance needed. It looks like updated technology, compared to other timekeeping solutions.”

— Michelle S., G2 Verified TimeClock Plus User

Leverage flexible codes for accurate job costing:

- Set up organization-wide codes and link them to the right employees or departments so those staff can only see jobs and job tasks relevant to their role.
- Adjust master job codes and job costing levels to fit specific departments' needs.
- Track budget on projects and the precise tasks employees are working on with cost codes.

Multi-level job costing:

- Configure codes across multiple levels to empower in-depth reporting, and even import straight from your ERP/HCM.
- Associate job codes with configurable cost codes related to employee's specified jobs and job tasks.
