

Hospitality

Seamless operations deliver the best guest experiences. That means keeping employees happy and business processes humming. TCP automates employee scheduling and time tracking for greater efficiency, accuracy, and flexibility that your staff and budget will appreciate—and experiences your guests will remember.

Springville Hotel's Restaurant and Bar

Example employee scheduling and time tracking struggles

Key needs across your corporate team

Chief operations officer

How can we standardize our business processes and effectively use our talent pool?

HR director

How do we mitigate compliance risk?

Chief technology director

How can we avoid high-maintenance tech solutions?

Payroll director

How can I accurately process employee hours? How do I accurately send hours to our payroll system?

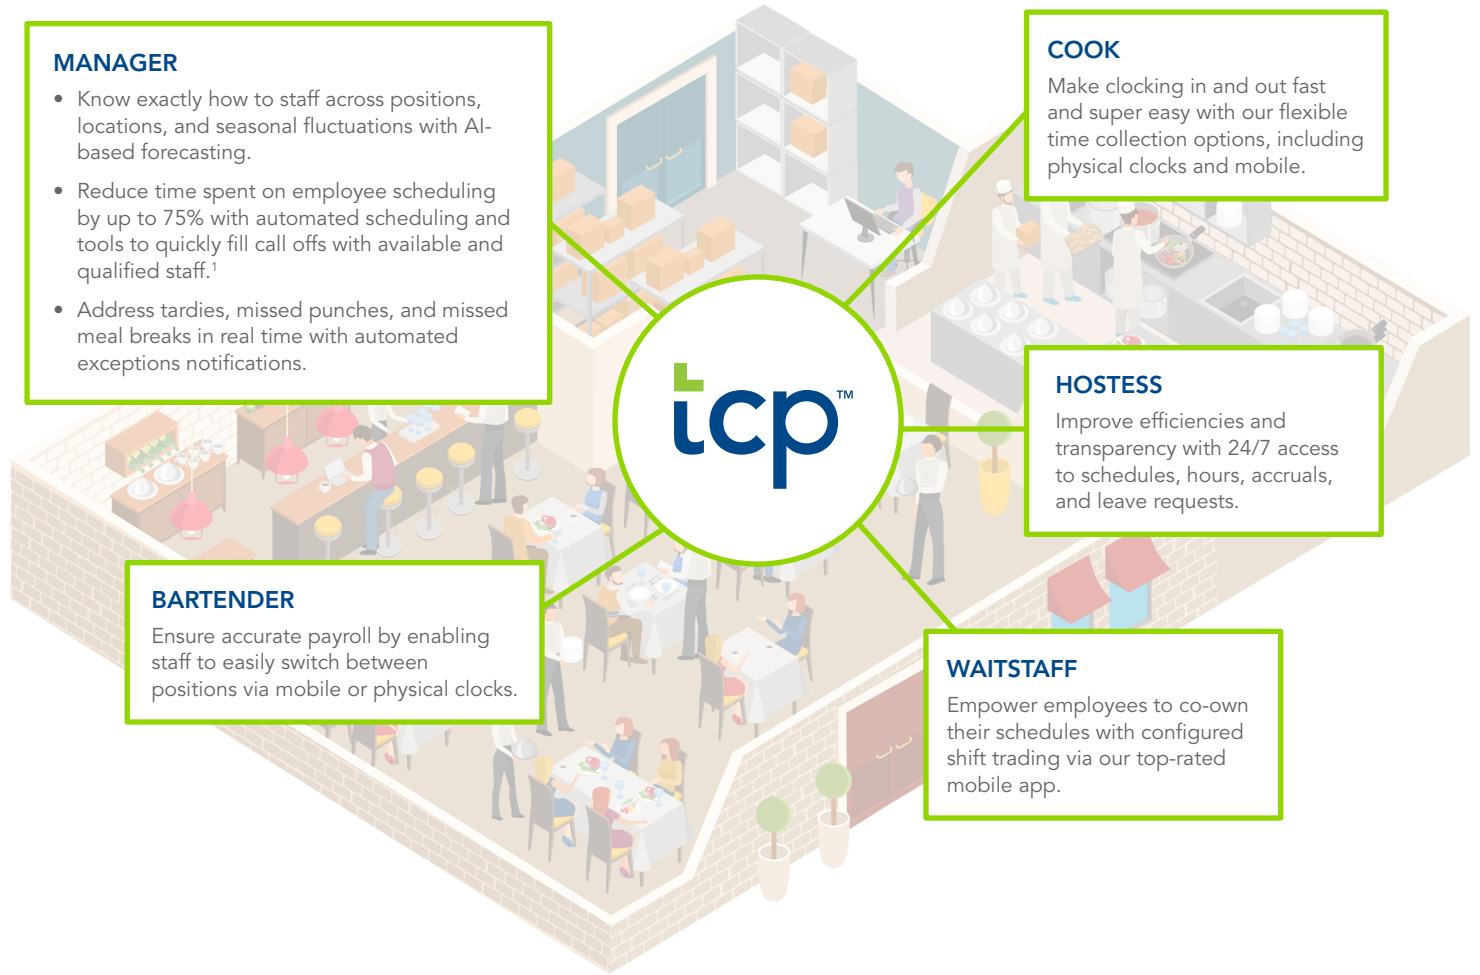

Chief financial officer

How can we stay on budget and exceed profit KPIs?

Springville Hotel's Restaurant and Bar

with TCP's automated employee scheduling and time tracking

Meet key needs across your corporate team

Chief operations officer

Boost profitability and efficiencies with automated employee scheduling, time, and attendance.

HR director

Adhere to labor laws and union rules with our configurable rules engine.

Chief technology director

Avoid resource waste and ineffective manual processes by integrating with your ERP/HCM system.

Payroll director

Improve payroll accuracy by up to 99% by integrating with your payroll system and automating payroll calculations—including shift differentials, overtime, and different pay rates by position.²

Chief financial officer

Control costs by eliminating unnecessary overtime, overscheduling, time theft, and time-consuming redundant processes.
