

Manufacturing

When every minute and dollar matters, optimizing labor can make a big difference to manufacturers' bottom line and employee satisfaction. TCP's automated time tracking and employee scheduling help you manage shift coverage and labor costs, mitigate compliance risk, and improve employee experiences.

Springville Manufacturing

Example time, attendance, and employee scheduling struggles

Key needs across your corporate team

Chief financial officer

How can we improve business outcomes, stay on budget, and exceed profit KPIs?

Chief technology officer

How can we avoid high-maintenance tech solutions?

Payroll director

- How can I quickly and accurately process payroll?
- How can I accurately send hours to our payroll system?

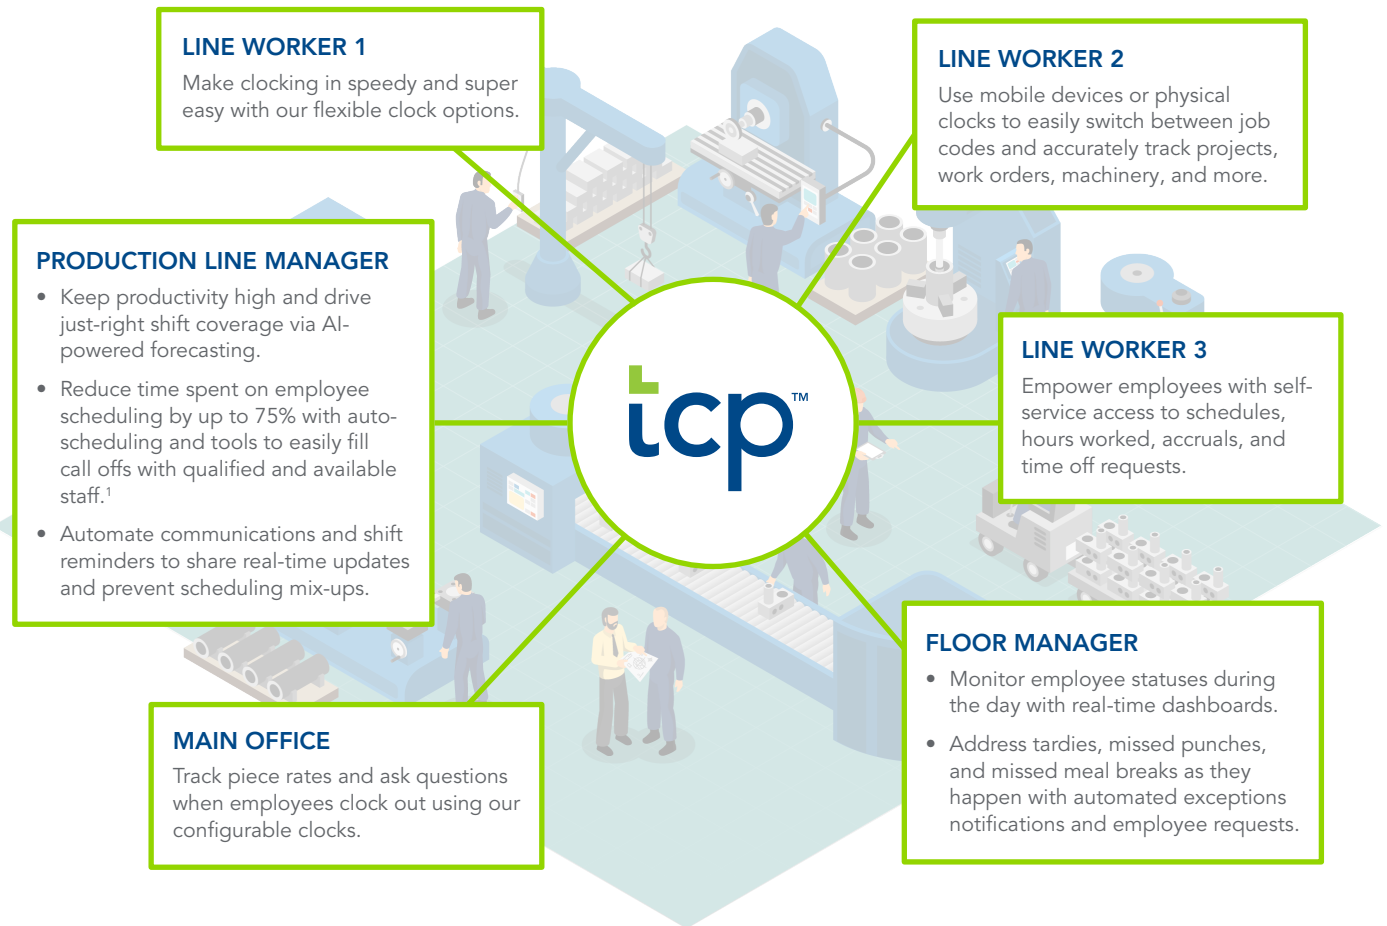

HR director

- How can I get better visibility into employee events that fall under FMLA?
- How do we stay compliant with CBAs and labor laws?

Springville Manufacturing

with TCP's automated time, attendance, and employee scheduling

Meet the needs across your corporate team

Chief financial officer

- Control costs by eliminating overscheduling, unneeded overtime, and inaccurate timekeeping.
- Drive decisions in real time with analytics reporting on overtime, productivity, and other KPIs.

Chief technology officer

Avoid process breakdowns with our durable, highly configurable clocks perfect for rugged environments.

Payroll director

Improve payroll accuracy by up to 99% and reduce effort by up to 85% by integrating with your payroll system and automating payroll calculations—including shift differentials, overtime, and different pay rates by position.²

HR director

- Adhere to labor laws and union rules with our configurable rules engines.
- Ensure error-free and timely processes with our built-in FMLA module and ERP/HCM integrations.
