TimeClock Plus and Humanity integration

TimeClock Plus offers automated time and attendance with accurate calculations across nuanced payroll rules, highly flexible time collection, and robust leave management.

Humanity provides dynamic employee scheduling with AI-powered forecasting, automated scheduling, and a top-rated mobile app that employees love.

As integrated solutions, teams can reap the value of both in a streamlined system, while eliminating double-entry, reducing risk of errors, and bolstering their workflows through the integration.

Key benefits

01 **Eliminate errors and remove dual-entry** with time and attendance integrated with dynamic employee scheduling.

02 **Put time tracking and employee scheduling** together at your staff's fingertips for anytime, anywhere access with the TCP Humanity app.

03 **Easily login and navigate between platforms** with SSO and easy navigation.

> As we've tested the TimeClock Plus and Humanity integration, I can predict a significant reduction in the need for double data entry. This will be instrumental in improving our data accuracy and efficiency. By linking time clock functions directly with employee scheduling, we will be able to eliminate many of the errors and inconsistencies that come with manual double work. It will streamline our processes by making our operational management more effective and less prone to errors.

— Tracey Mitchell, Operations Manager at Pacific Customs Brokers

Integrated time and attendance and employee scheduling

TimeClock Plus

Automated time and attendance with accurate calculations across nuanced payroll rules, highly flexible time collection, and robust leave management.

- **Control costs, eliminate errors, and save time** with automated timekeeping and robust payroll and ERP/ HCM integrations

- **Improve employee and manager experiences** with self-service, easy time collection, and exceptions management

- **Mitigate compliance risk** with missed break and overtime rules matched to labor laws and union mandates, along with secure audit logs

- **Improve workflows and reporting** with automated leave management and tracking across projects, tasks, and budgets

Humanity

Dynamic employee scheduling with AI-powered forecasting, automated scheduling, and a top-rated mobile app that employees love.

- **Create just-right schedules and control costs** with predictive forecasting and real-time auto-scheduling by availability and skill

- **Automate communications** to quickly fill open shifts, share schedule updates, and send shift reminders

- **Empower employees and bolster retention** with shift trading, shift pick up, and scheduling that honors employee preferences

- **Mitigate compliance risk and gain new peace of mind** with flexible rules matched to labor laws and internal policies
