

Browser-Based Bioscan

Greater Security and Compliance in One Small Package

What is it?

TCP's biometric scanner allows you to incorporate biometric employee verification in your normal computer-based employee operations. The scanner plugs into a computer with a typical USB-A port and prompts employees to scan their fingerprint when clocking in or out.

How does it work?

Working alongside our TimeClock Plus software, the Bioscan allows you to simply and efficiently add security to browser-based employee operations. When employees input their ID number, they are prompted to scan their fingerprint, verifying their identity and mitigating security risks.

Key Benefits

- Enhances security by incorporating biometric verification alongside an efficient browser-based application
- Reduces inefficiencies caused by inaccurate or compromised data
- Introduces low-maintenance technology with an easy-to-clean scanner
- Works even when offline for a dependable office solution
