

## INTRODUCING

# The Humanity Scheduling Apple Watch App

Live your life. Know your schedule. Work better.

Wearables continue to be one of the fastest-growing consumer product categories globally, and with growth comes growing expectation. TCP's Humanity Scheduling can now match those growing consumer expectations with an app designed specifically for the market-leading Apple® Watch, providing a better overall mobile experience for Humanity users.

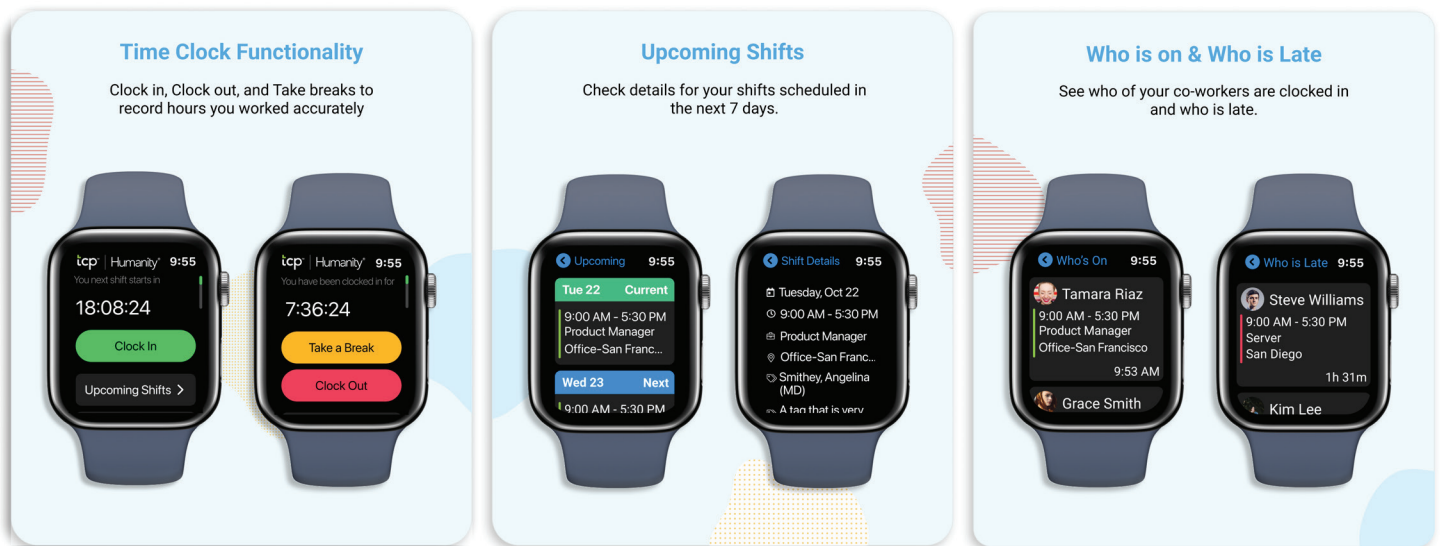

The Humanity Apple Watch app takes mobile convenience to another level, enabling employees to view their schedule right on their wrist and for managers to quickly see who's clocked in, who's late or even who may need to go home.

### Key Benefits

- **Never Miss a Shift** — With your schedule on your wrist, you'll know where you need to be and when you need to be there, even with last minute changes
- **A Time Clock on Your Wrist** — When you arrive, clock into your shift from the convenience of your wrist
- **The Schedule at Your Fingertips** — Managers can see who's clocked in, who's late and who may need to go home

## Humanity Scheduling Apple Watch App Mockups

The TCP Humanity Scheduling App for Apple Watch is available today and can be downloaded directly from the [App Store](#).
